

Employee Attendance & Productivity Analysis

Portfolio Project | January–March 2026

This synthetic portfolio project analyzes employee attendance, absences, late arrivals, shifts, locations and working hours using Excel, SQL, Python and Power BI-ready visualizations.

Key KPIs

Metric	Value
Total Employees	100
Working Days	64
Attendance Rate	90.69%
Absence Records	152
Late Records	298
Average Work Hours	8.07

Department Analysis

Department	Employees	Attendance %	Absences	Avg Hours
IT	24	91.7%	22	7.79
Sales	22	91.5%	33	7.73
Operations	16	91.5%	18	7.74
HR	12	90.5%	18	7.66
Finance	14	88.6%	41	7.50
Marketing	12	88.5%	20	7.61

Key Findings

- Overall attendance rate was 90.7% during the analysis period.
- There were 152 absence records and 298 late records.
- Department-level comparisons help identify attendance differences across teams.
- Monthly trend analysis can support staffing and scheduling reviews.
- Shift and location analysis can be used for operational monitoring.

Tools: Excel, SQL, Python (Pandas/Matplotlib), Power BI
